

Youth Parliament

The first year students organized a youth parliament on Budget 2010 on 10th March 2010. The activity was designed with the objective of deriving a deeper understanding of the structure and functioning of the parliament. The activity allowed the students to pose as different members of the parliament and explain the budgets of their specific ministry. The interactive question hour provided an opportunity to express and improve one's knowledge. The activity also helped the students learn the organization and management of an event. Overall, the activity was a fruitful investment.
